

Hackers Tantra - Live Mega Workshop

“The only event to promote the true Hacker Concepts”

The complete event is driven towards avoiding use of any third party automated tools and to get the basic, deepest, essential core knowledge of the Operating System.

Already three mega sessions of “Hackers Tantra – Live Mega Workshops” are successfully delivered to the audience, please find the following venue details of previous mega events

- **Hacker`s Tantra – v1.0 Live Mega Event – @ MIT College Of Engineering (Year 2009)**
- **Hacker`s Tantra – v2.0 Live Mega Event – @ Annasaheb Magar College (Year 2011)**
- **Hacker`s Tantra – v3.0 Live Mega Event – @ SNJB College, Nasik (Year 2011)**

Please note –

The syllabus provided here is the **absolutely brief syllabus**; it does not include our special topics, tricks which we used to deliver to surprise the audience

(The reason those topics are kept secret is – there are really some exclusive topics or tricks developed by us, on which Google also will not able to produce any result)

■ **BRIEF SYLLABUS:**

In this event following topics will be covered,

- **Advanced Virus Brain mapping –**
 - *In which attendees are going the design viruses without use of any programming languages along with how to remove deadly viruses without any antivirus.*
 - Create virus which can execute automatically at scheduled time
 - Create virus loop, where each virus will give back support to other viruses which ensure the none of the virus will be get deactivated
 - Create Hit -N -Run viruses - where virus will perform the desired action and will destroy itself after task accomplishment.
Also focus on concentrating on solutions of all above and other viruses as well
 - Like now a day’s Autorun.inf viruses are catching & destroying more and more pen drives and computers - so designing a final solutions for it, and will teach attendees about same.

Hackers Tantra – Live Mega Workshop

We are in the preparation of next mega event – the details will be published very soon.

- **Privacy Encapsulation –**
 - *Attendees are going to learn How to protect their valuable data without using any third party professional software. This session involves all basic knowledge of windows structure which enables to bypass the security mechanisms.*
 - *Live demonstration on breaking professional folder locking software.*
- **Can we hack using E-Mails?**
 - *A practical solution to the question*
 - *Many times people receive fake emails like lottery winner or special price winner. Ever wondered how these fake mails get generated? Now here see the live demonstration on how phishing attacks works...*
 - *Also learn how to verify the authenticity of the original mails.*
- **eXPerience –**
 - *Do extra ordinary changes to the Windows by controlling various features in windows behavior.*
 - *Hack Windows Login scripts*
 - *Design own key logger variation with zero knowledge of programming languages.*
- **Breaking Windows –**
 - *Know how to destroy the administrative securities set by the Windows Administrators with maximum efforts to avoid the use of third party automated software, because you should at least give a try to your knowledge rather than to third party password destruction weapons.*
